TECHNICAL DATA SHEET STAR679HC + Ag45% - 750 %

Universal master alloy for the production of yellow 750 % gold jewellery obtained by investment casting and mechanical working. The elements contained in this product ensure a high surface quality in investment casting, while in mechanical working a high deformation capability thanks the small grain structure, making it suitable for the production of hand and machine made hollow and solid chains, deep drawn items and tube. The use is suggested with the addition of 30 - 52 % of pure silver to the master alloy.
